www.ClassicLampPosts.com

Classic

Classic Lamp Posts offers unique reproductions of early American decorative light posts and luminaires. Our signature styles, the Washington and New England, will create an eloquent atmosphere to any entrance, courtyard or walkway. For the past 40 years Classic Lamp Posts has been a key ingredient in making projects an elegant success.

POLYSTEEL™ POST

The PolySteel™ post utilizes the latest in composite technology to provide a beautiful and affordable decorative post which looks like cast iron. Our posts are made by combining three composites giving them the structural benefits of steel with the low maintenance of poly resin.

THREE PART CONSTRUCTION

Part Two

Closed Cell Foam

The closed cell-polyurethane foam provides a solid encasement fusing the galvanized pole with the polyethylene exterior.

Part One

Steel Pole

We start with a galvanized steel pole providing a rigid structure and allowing for the ease of wiring.

Part Three

Linear Low Density Polyethylene

The rich black color of the LLDP is the same reliable and proven material used to coat outdoor telephone cable.

POLYCOMPOSITE POST

The PolyComposite post is made with a fiberglass pole instead of the steel pole. This allows for taller posts without sacrificing strength.

The Only Difference

Part One: Fiberglass Pole

We start with a fiberglass pole providing a flexible yet extremely resilient structure. Parts 2 and 3 are the same.

lamp posts

Cast Iron post peeling after years in the field.

Classic Lamp Posts Washington Base after years in the field.

GREATEST VALUE

- Low initial cost.
- Lower installation cost.
- Will never rust.
- Never needs painting.
- Vandal resistant.
- Impervious to the effects of salt, rain, ice and the sun.

INSTALLATION

The PolySteel™ post is available with our unique direct burial or anchor base.

The installation of the base is easy and can be completely installed in a short amount of time.

Direct Burial Base Simple 5 Step Instructions

1. To install the PolySteel™ post a hole must be dug as shown in the illustration.
2. The conductors are run through the post and the luminaire is installed on the post tenon.
3. The post is then set into the hole, one or two bags of premixed concrete and water are added.
4. The concrete can be mixed in the hole.
5. The remaining soil can be placed on top of the concrete and the post is then leveled.

Anchor Base Simple 4 Step Instructions

1. Use the anchor template for proper bolt placement. (Figure 1)
2. Bolt height should be approximately 2" above the surface of the foundation. (Figure 2)
3. Place the base over the anchor bolts, securing it to the foundation with washers and nuts. (Figure 2)
4. Cover nuts with decorative plastic covers. (Figure 2)

Figure 1

Figure 2

Note: Always consult local electrician code for wiring type and required foundation depth. Installation wires must always be at least 6" longer than pole height.

New England

Call **305-895-9525** Monday through Friday 9-5 Eastern Time

THE NEW ENGLAND STYLE SERIES

The New England Post compliments many architectural designs. This style of post was originally used around 1850 in Boston and other coastal cities for gas lighting.

New England Post

Comes in heights of seven feet and nine feet. When combined with our luminaires, these posts provide total heights of seven and a half feet to twelve feet.

Shown in the feature shot is a Victorian 4-arm (V-4).
Also available as a (V-5).

Classic Lamp Posts utilize a polymer resin on the exterior shell containing U.V. inhibitors that withstand the harsh effects of the sun.

Washington Post

Comes in post heights of seven foot, nine foot, twelve foot and sixteen feet high. When combined with our luminaires, The Washington Series Posts provide total heights of seven and a half to nineteen feet.

Classic Lamp Posts PolySteel™ and PolyComposite poles will never rust and will never need painting.

W

Washington

THE WASHINGTON STYLE

The Washington Post was designed around 1910 for street lighting in our nation's capital. Today you'll find the classic double fluted base and tapered shaft have become a standard American Design.

CREATE YOUR STYLE

Classic sconces and Victorian scroll arms offer elegant accents and beauty to your driveway or building entrance. Whether you prefer the single lamp or the multiple look, consider combining them with either the New England or the Washington posts to create a unique atmosphere that reflects your own style. All of our lamp posts are interchangeable with our huge variety of post tops making the selection of possibilities almost endless.

Sconces

We carry Victorian and Scroll wall arm sconces.

Cross Arm

Scroll Cross Arm is used for multiple luminaires.

Victorian 4 (V4)

We carry V4 and V5,

MAILBOXES AND BOLLARDS

Mailbox

Our traditional style mailbox can be a unique ornamental addition to your project. The mail box is maintenance free and easy to install. Shown - Double mailbox - also available in single and triple.

Bollard

Our PolySteel™ bollard is a reproduction of the old 1900's wharf posts historically found in many U.S. seaports.

THE MADISON STYLE

The Madison features the same qualities as our New England and Washington styles. It's century old look provides your projects with a unique historic feel. Classic Lamp Posts modern interpretation of the Madison style accents any installation with beautiful maintenance free poles and bases.

PolyComposite blend provides added strength making the sixteen foot Madison ideal for extreme high wind areas.

Madison Post and Base (shown)

Comes in posts heights of 14 feet and 16 feet making it extremely versatile. It is perfect for street signs and city light poles.

UNIQUE AND VERSATILE

The Madison can be installed over or around any existing pole to create a finished, uniform look without the extra time, effort and cost associated with reinstallation. In addition to offering unique installation options. The Madison is available in heights from 14 to 16 feet making it an ideal choice for cities and municipalities. With its combination of style, versatility and simple installation, the Madison is the favorite for renovating town squares and other public spaces.

SLIP OVER

The Madison Slip Over can be used on any pole by removing the fixture.

WRAPAROUND

The Madison Wraparound style allows you to decorate an existing pole without having to remove the fixture.

SLIP OVER

The slip over Washington and Madison poles are used to beautify existing installations. Available in fourteen and sixteen feet.

Classic Lamp Posts are manufactured with material containing up to 100% recycled content.

PRACTICAL APPLICATIONS

Virtually any existing pole can be transformed and made to look new. Here are just a few examples of our products applications.

- Lamp Posts
- Meter Poles
- Bollards
- Directional Signs
- Speed Signs
- Mail Boxes

BEFORE AND AFTER

Below is an example of a location with a variety of poles. Installed as the need arose, they provide function, but lack aesthetics and design. Making a beautiful setting less attractive.

To the right is the same location with Classic Lamp Posts Washington style slip over poles installed. With the expense of replacing entire poles eliminated, we have given the location a face lift. You can see the dramatic difference Classic Lamp Posts can give your hometown public areas.

Project Objective

Add extra lighting to the walkway and address the appalling look of the existing fixtures.

Execution

New Classic Lamp Posts bollards were added, solving the need of the extra lighting. Classic Lamp Posts slip over poles were used over the existing lampposts and meters. This addressed the aesthetic look of the existing installation.

Evaluation

Classic Lamp Posts allowed us to add new fixtures and resurface existing installation for a new uniformed look meeting all the project guidelines.

Thanks to Classic Lamp Posts the project objective was met while maintaining cost below the approved budget.
