MILLENNIUM STYLE PLANTERS DRAINAGE INSTRUCTIONS

Each TerraCast[®] Millennium style planter features a $\frac{3}{4}$ " threaded drainage hole (figure 2). A $\frac{3}{4}$ " threaded plug (figure 4) is provided with each planter to accommodate both indoor and outdoor applications. The plug should already be in place when delivered. **Be sure to remove the plug before planting if drainage is required.**

We recommend the use of $\frac{3}{4}$ " Funny Pipe Male Adapter (figure 5, not included), for irrigation or more controlled drainage. A Flex Pipe (not included) can be attached easily to the Male Adapter. Secure a Flex Pipe to the Male Adapter to apply desired drainage solution.
